

General Information

C4L is one of the leading data centre and connectivity solution providers in the UK, with over 1000 racks of colocation, a resilient Terabit capable network connected to over 40 data centres, and hundreds of delighted customers.

C4L's high-capacity, fibre, private network has been designed for speed and redundancy providing 100's of ISPs, streaming, hosting and gaming companies with transit services.

Throughout our history, C4L's goal has remained the same: to provide exemplary reliability across all of our services, ranging from colocation and connectivity, to the newer cloud-based services such as virtual private servers and elastic cloud computing.

At C4L we can provide a full spectrum of services, offering the complete solution:

- Virtual private servers
- Virtual data centre
- Elastic cloud computing
- Physical dedicated server
- Colocation
- Leased lines
- Wireless leased lines
- Interconnects
- IP transit
- Data backup
- Data storage
- Disaster recovery
- Data centre migration
- DDoS
- Managed services
- Telecoms

C4L is now in its 11th trading year and has a track record of 100% growth every year its client base includes Government, FTSE 250, financial institutions and many of the UK's network carriers. The company is privately owned with offices in Poole and over 40 data centre locations across the UK & Europe. The C4L Group employs over 50 employees and has a sales revenue of over £10m.

The business is committed to customer satisfaction and quality of service and has achieved certifications such as ISO9001 and 27001.
