

Derby

Midlands

C4L is pleased to offer extensive colocation options in the Derby data centre. This purpose built data centre is easily accessible by road, being just 5 minutes drive from junction 25 of the M1 and offers cost-effective high power colocation.

The Derby data centre has 24/7 manned security, supported by CCTV coverage throughout the facility. It also has VESDA installed, and N+1 power to ensure maximum resiliency for your solution.

This facility is part of the C4L multiple 10 Gigabit network and is connected to most major data centres across the UK and the Netherlands. All customers are provided with direct access to our Network Operations Centre and all customers' connections will be proactively monitored 24x7 by our team.

Using the Derby data centre comes with all the benefits you'd expect from one of the largest private networks in the UK, such as high speed IP Transit at low prices, Interconnects to all other major UK data centres, and high volume Data Backup amongst many other services.

C4L has over 10 years industry experience, and has one of the UK's largest data centre footprints. This, combined with managed data storage and connectivity products, and impeccable customer relationship management is the reason why over 500 core clients and millions of end users across the UK rely on C4L's services.
