

Maidenhead

M25 Orbital

C4L is pleased to offer exclusive colocation options in the Maidenhead data centre on the outskirts of London. This data centre is easily accessible by both road and rail, and benefits from a sub 2ms latency to London Docklands. Designed for 16Amps feeds as standard, it is the ideal outside M25 data centre location.

Being outside of central London, Maidenhead benefits from lower prices whilst still providing high performance. The data centre is on a separate power grid from the central London data centres, making it an excellent secondary site. The site also has all core Tier 1 bandwidth providers available through the C4L network.

This facility is part of the C4L network and is connected to most major data centres across the UK and the Netherlands. All customers are provided with direct access to our Network Operations Centre and all customers' connections will be proactively monitored 24x7 by our team.

Using the Maidenhead data centre comes with all the benefits you'd expect from one of the largest private networks in the UK, such as high speed IP Transit at low prices, Interconnects to all other major UK data centres, and high volume data backup amongst many other services.

C4L has over 10 years industry experience, and has one of the UK's largest data centre footprints. This, combined with managed data storage and connectivity products, and impeccable customer relationship management is the reason why over 500 core clients and millions of end users across the UK rely on C4L's services.

Power

- 10,000 sq ft data centre
- 1.5 mW onsite substation with diverse power feeds
- Multiple generators in N+1
- N+1 Redundant Parallel UPS system
- Single a dual power feeds available to racks
- Power to racks available on 8Amps, 16 Amps, Multiple 16 Amps

Air-Conditioning

- N+1 Airdale Air Handling systems
- 22C +/- 2C data floor temperature
- Cold Isle Containment available

Fire Protection & Security

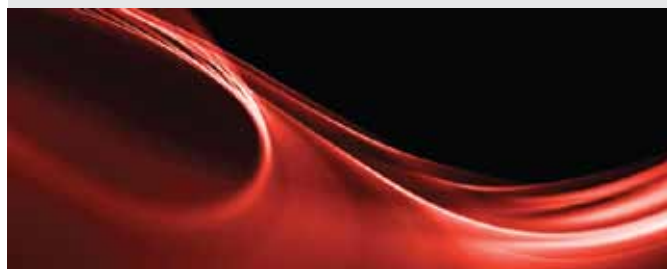

- 3-metre fencing and electric entry
- Anti-tailgating systems
- Entry to the buildings is via 24/7 swipe card systems
- 6-layer entry and 24/7 on-site Security
- CCTV
- Multiple stage protection
- FM200 fire suppression for clean rooms, plus internal and external plant

Communications

- Distributed Colocation Options
- Direct connectivity onto one of the UK's largest Metro Networks
- Premium Connectivity Services
- 40Gbps of Direct Upstream Connectivity
- Reliability of one of the UK's largest independent colocation providers
- Interconnects available direct to over 25 data centres across Europe

Onsite Services

- Office space available
- Secure cages from 126 sq.ft available with or without Racks
- 24x7 Onsite engineers and remote hands
- Restrooms and kitchen facilities available on all floors
